

Philosophy

The focus at Texas NeuroRehab Center is to help each patient become healthy and as independent as possible. For over 20 years, our programs have provided specialized and skilled therapy services.

Therapists work with individuals to identify goals, maximize the outcomes, and adapt to challenges throughout process of recovery.

Our goals are to assist with patient transition from hospital and the return to home, work, interests, and activities as fully as possible.

The treatment team at Texas NeuroRehab Center is dedicated to helping each patient become healthy and as independent as possible.
